OBJECTIVE

Fresher software developer skilled in Java, Spring Boot, and React.js, with hands-on full-stack experience shipping three production applications end-to-end.

EDUCATION

Oriental College of Technology <i>B.Tech, Information Technology</i>	Bhopal, Madhya Pradesh 2021 – 2025
Mother Teresa Senior Secondary School <i>12th</i>	Bhopal, Madhya Pradesh 2020 – 2021
Mother Teresa Senior Secondary School <i>10th</i>	Bhopal, Madhya Pradesh 2018 – 2019

INTERNSHIP

Software Development Intern <i>Vidyayatan Technologies</i>	Feb 2026 – June 2026 <i>On-Site, Bhopal</i>
- Built a real-time dashboard for internal use, enabling users to view live data and interact with system features. - Fixed integration issues between frontend and backend, ensuring reliable data flow across the application. - Built reusable UI components and managed application state, collaborating with the team through Git-based version control.	

PROJECTS

Home Review | *Java, Spring Boot, React.js, Capacitor, REST APIs* | [LINK](#)

- Built an AI-driven video inspection web and mobile application that analyzes room-by-room walkthrough recordings to auto-generate property condition reports and tenant ratings.
- Developed a dynamic pricing engine and a portable AI-based tenant rating system across the tenancy lifecycle.
- Built the cross-platform mobile app using Capacitor, along with tenant report generation and digital NDA signing workflows.

ICOSA | *Java, Spring Boot, React.js, Razorpay API* | [LINK](#)

- Built a global school accreditation platform providing research-backed, dual-assessment certification for K-12 schools across 15+ countries.
- Integrated the Razorpay payment gateway to handle accreditation fee payments securely.
- Built and connected frontend interfaces with backend REST APIs to deliver a seamless accreditation workflow across four role-based portals: School, Counsellor, Admin, and Super Admin.

T-FOMS | *Java, Spring Boot, Capacitor, REST APIs* | [LINK](#)

- Built a role-based forest offense case management system for the Telangana Forest Department, spanning 8 officer roles.
- Built backend REST APIs in Spring Boot for offense recording, case review, and approval workflows.
- Built the mobile app using Capacitor for field officers to log offenses and capture evidence on-site.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming

Frameworks & Libraries: Spring Boot, React.js, Capacitor, Tailwind CSS, Shadcn

Databases: SQL, Supabase

API Development & Testing: REST APIs, Postman

Developer Tools: Git/GitHub, VS Code, Cursor, Postman, Claude Code, GitHub Copilot

CERTIFICATIONS

UX/UI Designing | [Link](#)
